## Year Two Maths Homework

This homework relates to Maths work covered in class this week.

Children are "counting back" as a strategy to calculate subtraction sums.
Here's a game to play at home:

You will need a person to play with, a handful of small objects each such as dried pasta shapes or small Lego bricks, and a dice.

1. Take a handful of objects each. Count how many you have and write down the number.
2. Take turns to throw the dice.
3. Take away the number of objects shown on the dice, but first say how many you will have left (you can "count back" to help you work this out).
4. The first player to get rid of all their objects wins. You must throw exactly the right number to finish.

At home, I played this game with $\qquad$ . In the end, $\qquad$ won!

Children are mentally adding 10 to a 3-digit number (such as 123 or 156 etc).

Complete this number square, one column at a time. Work down each column. Add 10 mentally to the number before.

We expect your child to completely these tasks independently. Please see your child's class teacher if you have any further questions on this particular piece of homework or to find out how to provide additional support/extension work.

This homework is due back to school next FRIDAY.
