Year Two Maths Homework

This homework relates to Maths work covered in class this week. Children are applying the strategy of 'crossing 10' to help them perform subtraction sums using larger numbers. Children should complete these sums in 2 stages. First, children should subtract "down to" the next multiple of 10. They should then apply their knowledge of the 'number bonds of 10' in order to 'subtract what's left' from this multiple of 10. When mastered, children should find this 2-part strategy more reliable and flexible than adding on with cubes, fingers or number-lines.

'Crossing multiples of 10' when subtracting	Complete these sums in 2 stages: 1. Get to the multiple of 10.    2. Subtract what's left.
$27 - 9 =$ 	$64 - 7 =$ 
$54 - 9 =$ 	$75 - 8 =$ 
$15 - 9 =$ 	$46 - 8 =$ 
$34 - 7 =$ 	$83 - 8 =$ 

Unless otherwise stated, we expect your child to complete these tasks independently. Please see your child's class teacher if you have any further questions on this particular piece of homework or to find out how to provide additional support/extensionwork.

This homework is due back to school on Friday.
