Year Two Maths Homework

This homework relates to Maths work covered in class this week. Children are revising strategies to calculate the "difference" between two numbers. Children are taught to **subtract** when calculating "difference". Help your child to read and understand the below problems. Help them to make the link between "difference" and "subtraction". Encourage children to show their "working out" in the space provided. Some children may even be able to perform these subtractions mentally. Other children may need extra support. If this is the case, guide your child to using the 100 square below.
